Vietnam improving gradually in global corruption ranking

Vietnam's most recent ranking in Transparency International's Corruption Perceptions Index (CPI) is 81 (improved 36 ranks in 7 years). We observe a lot of similarities in Vietnam what path another small and poor Asian nation took in the past, Singapore: One ruling party, Open trade policy, favorable FDI terms, pro-education, firm rule of law, constant long-term aim to raise GDP/capita to top levels in future.

Vietnam’s equity market has historically traded at a long-term average P/E of around 16. On three occasions, valuations have exceeded a P/E level of 20. Similarly, the VN Index’s P/B valuation has risen above 3.0 three times over the past 15 years. The 3,200-point target for the VN Index is based on an average earnings growth of approximately 18–20% over the coming years. In 2025, market earnings growth is expected to exceed 20%.

Banks play a big role in PYN Elite's portfolio

Per 10.04.2026, Source: PYN Fund Management

We believe in Vietnamese banks. The Central Bank of Vietnam has controlled the sector with strict measures to avoid overheating, which will protect the banking sector from a boom and bust scenario. Banks businesses have two strong pillars for their earnings growth: Fee income and interest income. New fees and loan growth both have brisk future potential for the banks in Vietnam.

Market modernization outlook in Vietnam

Vietnam in MSCI Index

Current status

Vietnam's Frontier Markets Index weighting: 28.49% and the biggest in the Index.

2026-2028

Potentially enter Watchlist for Emerging Market.

2028-2029

Upgrade to Emerging Market status.

Two issues need to be solved before Vietnam emerging market upgrade

FOL

Vietnam to rewrite the regulations aiming to two alternative solutions:

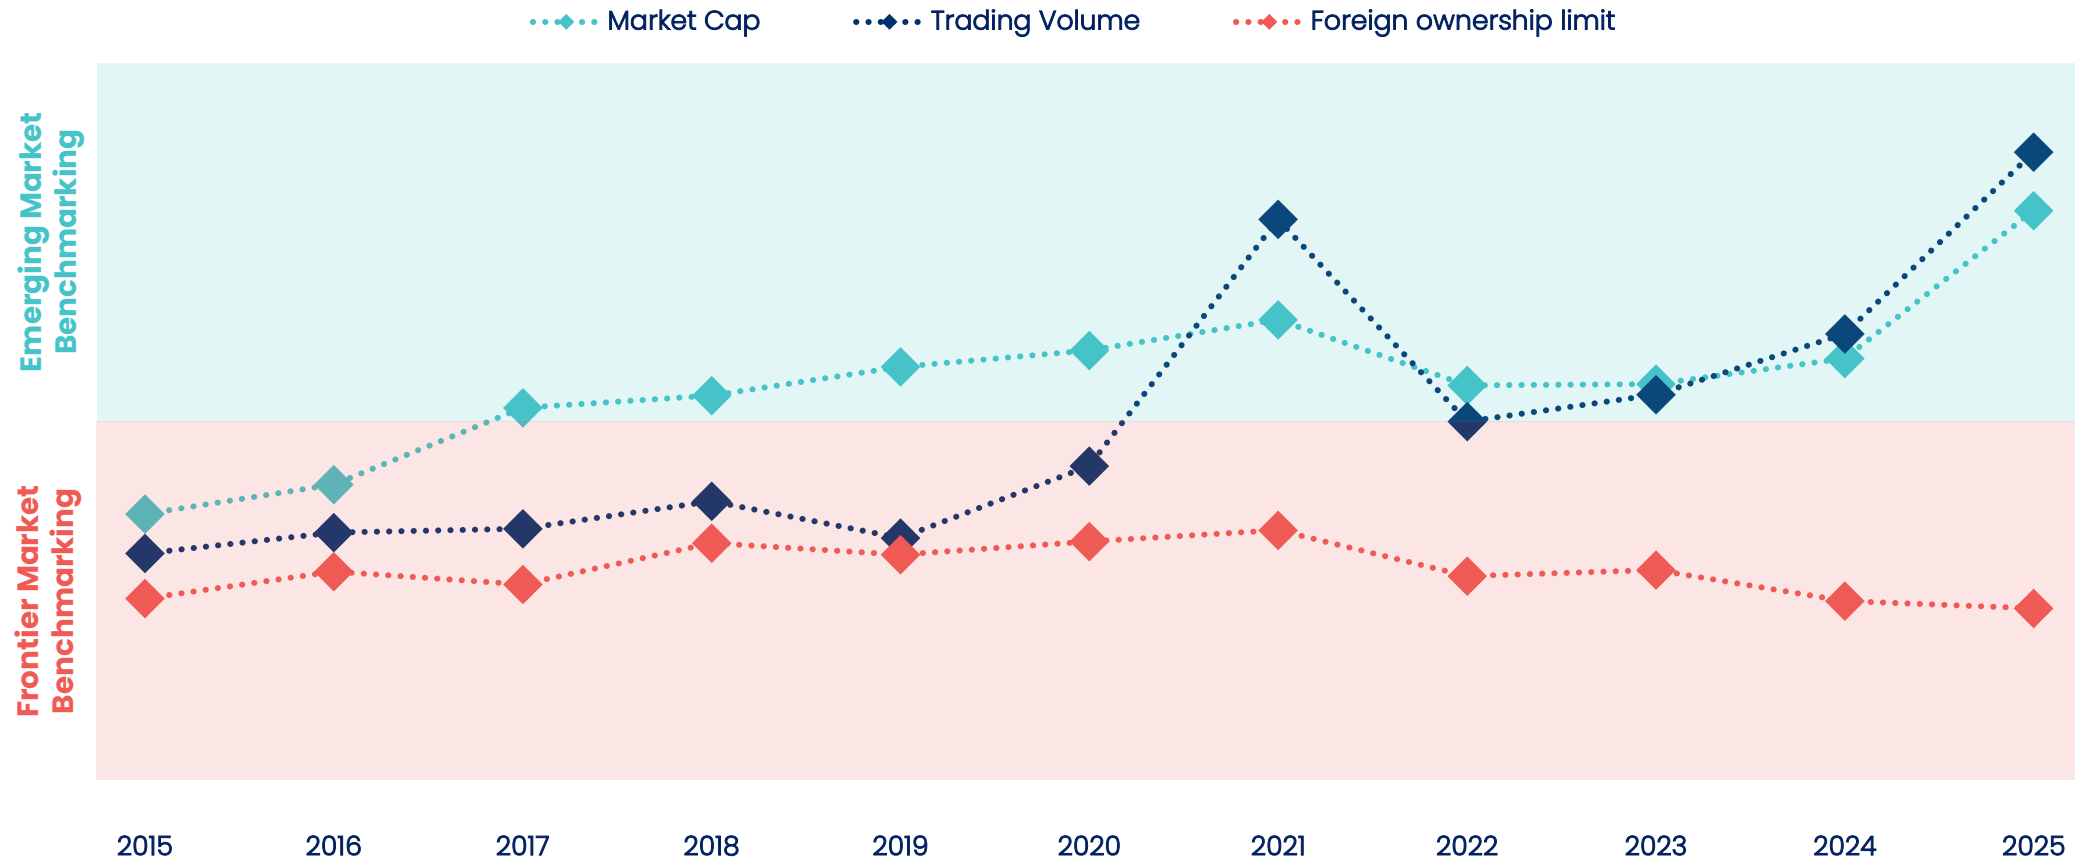

- Ease restriction on FOL by automatically lifting a 100% FOL in public companies, exception only for restricted businesses e.g. banks, defense, telecom related.
- Extend the definition of deposit receipt (DR) and the provisions on non-voting depositary receipt (NVDR).

Pre-funding

Establish a Central Counterparty (CCP) based clearing system for a platform to:

- Allow short sales and day trading.
- Trading without any deposit requirements was introduced in November 2024 to solve partially pre-funding issue.

MSCI criteria and the current status of the Vietnamese stock market

Source: PYN Fund Management

MSCI has three key criteria to classify the Emerging market. Of those three, Vietnam already has a sufficient number of companies with a large market cap and the market's trading volume satisfies the criteria. The third criterion will be fulfilled when Vietnam presents solutions to the limitations on foreign ownership. The prefunding rule is another additional issue, which has been partially solved since November 2024.
