Our recent study compares PYN Elite's key Vietnamese holdings to comparable peer companies in Thailand. Surprisingly, Thailand's domestic businesses have achieved rather dismal growth in this time period. By contrast, Vietnam's growth numbers are extremely strong. Remark: Vietnam's bank and property crises in years 2009-2012 set a very low base for the CAGR growth comparison.

Vietnam GDP vs Finland GDP 2008–2022

Source: PYN Fund Management

EUR/USD Rate and PYN Elite Hedging

Source: Bloomberg

PYN Elite returns are impacted by the strength or weakness of the Euro. Currency hedging has been used as a tool to protect our portfolio from potential Euro strengthening. During the 2001-2008 period, we were fully-hedged for our portfolio. 2008 – 2/2019 we kept the currencies open. PYN Elite portfolio has been fully-hedged again as from 26.2.2019.
